Unlock the ultimate in pest control efficiency with Bigshot Maxim Concentrate. Our versatile solution is your answer to tackling flies, ticks, chinch bugs, Japanese beetles, ants, roaches, chiggers, crickets, mosquitoes, gnats, no-see-ums, scorpions, and fleas. Rest easy knowing it's safe when used as directed and won't harm beneficial insects like bees. Our formula leaves behind a residue that is non-toxic to these vital pollinators, but be sure to apply it when bees are not actively pollinating. Plus, Bigshot Maxim Concentrate is proudly non-GMO and boasts a pleasant scent derived from essential oils. Also, effective against soybean gall midge, corn aphids, and soybean aphids in agricultural crops. Bigshot Maxim serves as a comprehensive solution for controlling mosquitoes in their various life stages, including larvae, pupae, and adult mosquitoes. When applying Bigshot Maxim to bodies of water, it's essential for users to proactively verify whether they need permits from state authorities before proceeding with the application.

How to Use: 1. **Preparation is Key:** Start by thoroughly reading the full label instructions before use. We want you to get the best results, and knowledge is your first step. 2. **Shake Things Up:** Before you get started, give the product a good shake to ensure it's well-mixed and ready to go. 3. **End Hose Spray for Broad Coverage:** To cover a generous 5,000 square feet, simply add 6 fluid ounces of Bigshot Maxim Concentrate to your Bigshot Maxim OUTDOOR container. Attach it to your water hose and spray generously over shrubs, plants, lawns, trees, and more. Make sure to overlap your application for consistent results. For persistent mosquito problems, don't hesitate to reapply as needed, especially after heavy rainfall. 4. **Fogger for Precision:** When precision is key, opt for our fogging method. Mix 3/4 to 2 fluid ounces of concentrate per gallon of water to cover up to 1,000 square feet. Spray this solution on foliage and the surrounding areas where you plan to spend your time outdoors. 5. **Stationary Mister for Large Areas:** For extensive coverage, consider using our product with a 55 Gallon Automatic Mosquito Misting System. Add 16-25 fluid ounces to the system to effectively safeguard large areas.

Precautionary Statements: Causes eye and skin irritations. May cause phytotoxic burn to plant life if applied in temperatures over 90°F / 32°C or in full sun with high temperatures. **First Aid:** IF IN EYES: Hold eye open and rinse slowly and gently with water for 10-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

Storage & Disposal: Do not contaminate water, food, or feed by storage or disposal. Store the original container in a cool, dry area away from children and pets. Container Disposal: Do not reuse empty container. If empty: Offer for recycling available or discard in a sanitary landfill. Call your local solid waste agency for disposal instructions.

"This product qualifies for exemption from EPA registration under Federal Insecticide, Fungicide and Rodenticide Act (FIFRA)"
