DIRECTIONS FOR USE

FOLIAR APPLICATION:

1. Measure using the included measuring scoop in the Carry-R Foliar powder bag.
2. Preslurry Carry-R Foliar with water before introducing into the tank mix. Batch mixing is recommended.
3. Add to tank mix and top off with water carrier. It's vital to continue agitation throughout the tank-mixing process and allow enough time for recirculation between additions of each separate product. Failure to add products one at a time, lack of sufficient water during mixing or insufficient agitation can result in product separation. Applicators should continue agitation throughout application to keep all ingredients suspended.

Read the entire front and back label before using this product. Use only according to label directions. To the extent consistent with applicable law, this product shall not be reverse engineered or used by Buyer for research purposes.

RATE:

Use 2 oz. of product per acre. Add dry product with tank mix and top off with water carrier.
