Dry wettable powder in water suspension.

Carry-R™ MA (with Microalgae)

Carry-R MA Foliar is designed as a soy protein-based dry wettable powder to deliver plant necessary inclusions effectively and efficiently for the farmer. Carry-R MA can be used as the inclusion carrier technology™ in existing tank-mix blends to enhance plant response.

- **Advancing Regenerative Ag** – ingredients in Carry-R MA are renewable and sustainable soy protein, contributing back to American farmers.
- **Improved Soil Conditions** – Excellent starter food for microorganisms and improves microbial growth.
- **Perfect Inclusion Carrier Technology™** – the patented soy protein base provides a food source to any microbes you may add to your foliar mix.
- **Extended Suspension Time** – will stay in suspension by itself for up to 36 hours in water.
- **Clean and easy to use dry wettable powder.**

Also available

Carry-R™ (without Microalgae)
