DRI★FECTA[™]

**Growers Will See
the Difference!**

**Improve Plantability-
Faster easier planting**

**Get Your Seed
Planter Ready!**

What is Dri-Fecta?

- **Dri-Fecta** is a patented microplastic free, dry blend of powder ingredients intended for use as a dry seed finisher for use on seeds that need delivery of dry powders and to apply after liquid application of seed treatments. It has been optimized for improving the appearance and flowability of seed. It provides superior seed flow through equipment setups and planters.

WHEN APPLIED, Dri-Fecta:

- Application can be on seed with the aid of commercial applicators specifically designed for accurate application of dry bulk simultaneous with liquid seed applied technologies. We do not recommend using Dri-Fecta in liquid slurries.
- Dri-Fecta can be used with other polymers to promote adherence on seed, flowability of seed, and reduce dust-off

BENEFITS TO USING DRI-FECTA

- Superior Seed Flow and Appearance
- Shiny appearance – treated seed shimmers and shines!
- Reduce bridging in treating equipment and boxes
- Improve Plantability– Faster easier planting, with less skips, less doubles in the meter and improved seed flow in the planter!
- Supports application of higher amounts of liquid treatments
- Improves drying even in cold temperatures.
- Helps reduce dust-off to improve worker safety when handling product.
- Use Rate: 1 to 3 oz per CWT (Average 0.5 oz per unit of seed)
- Package size: 25 pound Bag-in-Box
- Proprietary blend of dry powders of silicate mineral base and soy protein

PRECAUTIONARY STATEMENTS:

PERSONAL PROTECTION EQUIPMENT (PPE): Wear protective gloves, protective clothing, eye protection and face protection. In case of inadequate ventilation wear respiratory protection.

Do not use treated seed for food, feed or oil purposes.

* Read and follow all labeled instructions
